Sponsor a Pig

You could change the life of someone forever by doing something as simple as sponsoring a pig.

Spring Point Project is working in partnership with the Diabetes Institute for Immunology and Transplantation of the University of Minnesota to develop a cure for insulin-dependent diabetes that will be widely available and affordable. Because many people with diabetes lack sufficient insulin-producing islet cells, the cure in development involves producing safe, reliable islets that can be transplanted and reverse the effects of diabetes.

This new and virtually unlimited supply of insulin-producing islet cells is now being produced—from pigs!

But raising “medical grade” pigs is expensive. They need to be housed in a highly specialized environment, maintained by professionals highly trained in animal healthcare, eat special food, drink purified water, and breathe filtered air.

It costs nearly \$50 per day, per pig, to maintain our pigs in the type of environment that will make their islet cells suitable for transplantation.

We’re asking for your help. By sponsoring a pig and helping us defray costs, you could free a person with diabetes from the day-to-day burdens of insulin administration and constant worry about the complications caused by insufficient blood sugar control.

Please consider sponsoring a pig for a day, week, month, quarter, or year.

For more information about Spring Point Project, and the exciting cure in development, please go to springpointproject.org.

I/We would like to help in the fight to cure insulin-dependent diabetes by sponsoring a pig for:

A day \$50 x $\frac{\quad}{\text{\# of days}}$ = $\frac{\quad}{\text{pledge}}$

A week \$350 x $\frac{\quad}{\text{\# of weeks}}$ = $\frac{\quad}{\text{pledge}}$

A month \$1,500 x $\frac{\quad}{\text{\# of months}}$ = $\frac{\quad}{\text{pledge}}$

A quarter \$4,500 x $\frac{\quad}{\text{\# of quarters}}$ = $\frac{\quad}{\text{pledge}}$

A year \$18,000 x $\frac{\quad}{\text{\# of years}}$ = $\frac{\quad}{\text{pledge}}$
