PROJECT NEW HOPE

"NEW HOPE...NEW LIFE"

Issues affecting Vets and their Families:

- 50% of the more than 1.6 million troops deployed to Iraq and Afghanistan have been deployed twice or more.
- 2 out of 3 Vets that require some form of help are NOT getting or seeking help.
- Suicide rates for Vets age 20-24 are 400% GREATER than their civilian counterparts.
- Recent military study shows that 75% of all suicides are the result of a failed relationship once the soldier returns home.
- Veterans who have committed suicide now outnumber the combat Vets killed in action in Iraq and Afghanistan combined.

Statistics say every 40 minutes a soldier tries to commit suicide.

Every 80 minutes a soldier does commit suicide.

Project New Hope

Mission: Provide veterans and their families the education, training, and skills necessary to manage their lives after wartime service.

Following wartime service, many veterans and their families have a tough time making the transition back to the lives they led before the war. After serving in combat, the statistics for veterans and their families are heartbreaking. Spikes are seen in divorce, substance abuse, job loss, home loss, physical abuse, and suicide.

Project New Hope was founded to help these families with the transition from wartime, back to peacetime. We believe many of these personal tragedies can be avoided with a combination of compassion, understanding, and professional guidance.

At Project New Hope, veterans and their families are given a weekend retreat away from the demands and distractions of their daily lives – a chance to slow down, reconnect, and spend time together with counselors from the Department of Veteran Affairs.

We will never charge any of the families involved. Instead, we reach out to the corporate community and host fundraising events to help us fund the life-changing work that we do.
